I accepted the money and the command of the Governor of Indiana with the condition that he go with me to deliver the baskets. I was a police reporter then and pretty well acquainted with the "lower five" side of Indianapolis. Somebody had told Governor Hanliv that.

Somebody had told Governor Hanly that.

At first he hesitated about going, but later decided to help me distribute his Thankegiving cheer. I believe his daughter, now Mrs. Harry O. Garman, went with us that night. Anyhow, we scattered Thankegiving baskets over a humble, but to-be happy part of town. Governor Hanly liked the excursion so well that before we separated that night, we had decided on another "happiness party," as he called it, for Christmas eve. Own Boybood Poverty-Ridden.

It was while we were on these little pilgrimages-we had several of them-that I heard from him stories of his own humble, poverty-ridden boyhood, and I knew why he felt so deeply the call to help the poor children.

I believe it was on that first Thanksgiving eve that I heard Governor Hanly first proclaim his hatred for liquor. We had gone to the house of a small friend of mine in the vicinity of the river dumps. Governor Hanly went with me into the house. Old Joe was drunk again that night, and Mrs. Joe, with the five children, was letting him sleep it off back of the kitchen stove. He awakened when Mrs. Joe expressed delight over the basket. I saw visions right then of that basket being sold for booze and I jerked Joe out of the corner, telling him that if he touched that basket I would come back and break his neck. The Governor then stepped up to Joe and said:

"And if he doesn't do it, I will." Before we left I whispered in stories of his own humble, pov-

One Christmas Eve.

Governor Hanly and I had two experiences one Christmas eve that I'll never forget. One was amusing, the other intensely sad. We had the latter experience first. He and I had loaded a lot of baskets and toys in and on top of a hack. We drove to a home in Chestnut street. I knew of two widows—sisters—who had been left with a flock of children to provide for. If memory serves me right each had five kiddles to feed. All lived together in half of a small double house.

When we arrived there we walked around to the back of the house. Peeping in through the broken shutters we saw the flock of kiddles playing ring-around-a-rosy in the kitchen. The only light came from the front of the kitchen stove. The mothers had gone to deliver washings to get Christmas money. Governor Han-We had the latter experience first.

Christmas baskets were from a well-wishing friend. The kids jumped up in my arms and I was almost a wreck when I finally reached Governor Hanly. Then a pathetic picture presented itself. There stood poor Hanly, leaning against the shutters with his head buried in his arms. I have never heard such sobs come from a man. I knew what was in his heart that Christmas eve, for, as I said before, he had told me the story of his own boyhood in and around Williamsport. I took him by the arm and led him back to the hack. And I was truly glad when, a few minutes later, we entered another house where two little girls were sitting in their "nightles" waiting for Santa Claus. They had faint hope that night I'm sure, judging from appearances in that home.

The moment we entered the door I knew I had to make Ananias look like George Washington by comparison with me. For the smallest girls—she was not more than three—jumped toward me and cried:

"Santa Claus!"

Governor Hanly was right at my heels. He laughed as heartily as he had sobbed sorrowfully only a few minutes before.

"Bill Santa Claus, you're in for it." he roared.

Then I began to lie. I had to tell the little girl that Santa Claus was so crowded with business that night that he had sent me to deliver her Christmas happiness.

Then I did a foolish thing. I told her that I could show her Santa Claus' sleigh. The street was so bad that our hack could not come nearer than a half block and I remembered looking back and I remembered looking back and seeing the cabby sitting on top, his form and that of the hack silhouetted against the distant street light. The snow only added to the picture. It struck me that the cabby appeared decidedly Santa Clausy that night.

So I carried the little girl to the window and showed her our cabby. "See, there he is." I told her.

Barefoot Through the Snow. While it is probable that the steam roads will receive the same rates for intrastate traffic as were granted by the interstate commerce commis sion for interstate traffic, this action is not certain. The general supposition of those who are in touch with the rate situation is that the Indiana commission will concur in the deci-sion of the interstate commission. However, the commission will decide the case as it affects Indiana on its merits, Mr. Lewis said, and not on the basis of any previous awards made by other commissions. made by other commissions. The state commission has the right to make proper adjustments and reductions in rates, where it deems it necessary. The transportation act, however, provides that no state can make rules which will be burdensome on interstate commerce. It is within the powers of the interstate commission under this act, where state commissions have taken such action, to issue orders raising the rates to the interstate level.

When the railroads filed their pe itions some time ago, they asked for an increase in freight rates similar to those which were to be granted by the interstate commerce commission. Mr. Lewis says the 20 per cent. increase in passenger fares for interstate traffic will raise the railroad rates to nearly 4 cents a mile. The new rate will be 3.6 cents a mile. With 8 per cent. added for war tax. bringing the total to 3.38 cents a mile. With Pullman rates advanced 50 per cent. riding "de luxe." Mr. Lewis pointed out. will cost nearly 5 cents a mile. Mr. Lewis said the hearing of the railroad petitions will give an opportunity for discovering whether inequalities between Indiana and Illinois freight rates, discriminating against Indiana, still exist. The Indiana commission conducted a fight lasting over three years against discriminations, and recently received orders from the interstate commerce commission alleviating the situation to a large extent.

Search for Campaign Thunder. The Democratic and Republican organizations are busy taking stock of what effect the special session of the Indiana legislature, which closed Friday night, is likely to have in the

campaign. The Democrats express the belief that the legislature served no other good purpose except to grind out large quantities of excellent campaign material for use by the Democrats to show the results of alleged Republican incompetency. The remedial and home rule tax bills enacted Republican incompetency. The remedial and home rule tax bills enacted by the general assembly are being studied by the Democrats in an attempt to find telling points on the tax questiog to be used in the campaign. Evan B. Stotsenburg, of New Albany, who for a long time was one of the most capable members of the senate, and later was attorney-general of Indiana, attended the special session and took notes on what was going on and the bills that were voted through. He is now making an analysis of what was done and the results of his work will be available to the Democratic state organization. Warren T. McCray, Republican nominee for Governor, probably will not begin his speaking campaign for a month, and may open it with a "keynote" speech.

Dr. Carleton B. McCulloch, of Indianapolis, Democratic candidate for Governor, will make several addresses this week, but will not make his "keynote" until later. Dr. McCulloch is planning to cover a large part of Indiana to make the personal acquaintance of as many persons as possible.
